IRVING FISHER'S DEBT DEFLATION ANALYSIS: FROM THE PURCHASING POWER OF MONEY (1911) TO THE DEBT-DEFLATION THEORY OF THE GREAT DEPRESSION (1933) Michael Assous¹ 1 Introduction Fisher introduced the debt-deflation theory of depression for explaining the Great Depression of the early thirties

Irving Fisher on Debts and Over-indebtedness

entitled "The Debt-deflation Theory of Depression" in which he maintained that "over-indebtedness" and "deflation" are two factors that tend to reinforce one another Deflation swells the burden of debts; and over-indebtedness leads to debt liquidation which engenders ...

11 Aggregate Demand II

debt-deflation theory An unexpected decrease in the price level redistributes wealth from debtors to creditors If debtors have a higher propensity to consume than creditors, then this redistribution causes debtors to decrease their spending by more than creditors increase theirs As a result, aggregate consumption falls, shifting the IS curve

Irving Fisher's 1911

Fisher made his debt-deflation theory about depressions based on just three observations, the depression of 1837-41, the depression of 1873-79, and the depression that he was living through, that began in 1929 He apparently thought that the depression of the 1890s did not rank in severity enough to be included in the list

Macroeconomics Meets Hyman P. Minsky: The Financial ...

Irving Fisher called a "debt deflation" can take hold Both Fisher and Minsky believed that such a process occurred during the 1930s, and that this is what made the Great Depression so severe It must be emphasized that mainstream theory rules out of existence such processes and argues in any case that deflation helps the economy by
