to perform at least one jump in a 3-month period due to reasons beyond the member's control, the member may jump twice during a 6-month period, including two jumps within the same month, to maintain pay eligibility for two consecutive 3-month periods The following exceptions are waivers to the 3-month jump rule:

MINIMIZING THREAD BREAKAGE & SKIPPED STITCHES

- Is the thread breakage or skipping occurring primarily on one operation or type of machine?
- Is the thread breakage or skipping occurring on one or two machines only?

The reason for this analysis is to help you differentiate between thread related problems and machine related problems Common sense should tell you that if a

Assembly Language Programming: Subroutines

program finds the sum of the first one and displays the result on the ports P1 and P2, and then finds the sum of the second array and displays the result on the ports P3 and P4 It is obvious that we can have a single subroutine that will perform this operation and thus make our code more readable and reusable

A Very Expensive Lesson In Batteries 101

destruction Another thing I learned that makes all of this experience even more painful is that when one or more batteries in a battery bank go bad, it is best to replace all of the batteries in the bank When you only replace the one or two that are bad, the remaining weak battery(ies) just serve to bring down the new replacements that much

1 Poisson processes, and Compound (batch) Poisson processes

network, the times at which one receives or sends email, the times at which one sells or buys stock, the times at which a given web site receives hits, or the times at which subways arrive to a station Note that $t_n = X_1 + \dots + X_n$, $n \geq 1$, the n th arrival time is the sum of the first n interarrival times
